

I am writing to ask you to reject the NAB's petition 04-160. As a subscriber to XM radio, I believe that it is my right to listen to my choice of programs. I would hate to think that government agencies will start to censor what we the public can listen to by regulating such information as weather and traffic reports. It is simply a matter of healthy competition----it happens every day. I pay for this service and do not see how I can be denied. I urge you to reject petition 04-160! Please!!!
